Rogue Valley Fire Chiefs Association

Summer 2026

Evacuation Group

Works for the IC - Takes the issuance and future management of evacuations off the ICs plate. The problems that need to be managed will outpace us quickly without delegation to this group early.

3 or 4 key players

- **Emergency Manager** - Control, access to the technology, and responsible with much of what comes next.
- **Fire Rep** - Fire Behavior, risk assessment, suppression timelines.
- **Law Rep** - Statutory authority to say go, security, manpower.
- ***Political rep*** - In some cases will help with one voice, one conversation of options, may help provide cover for them.

Lessons Learned

- You can and (should) account for LAW
- You can go too fast
- You can split zones
- The responders need to know the status of the Zone's
- EM's need to know if we "issue" level '3' inside a level 1 or 2 zone.
